

Nucleus Conference 2017

Hannover > 06.10.17

Science is not neutral

A wide-angle photograph of a cable-stayed bridge at dusk or night. The bridge's towers are brightly lit, casting a warm glow on the surrounding water and sky. The cables are also illuminated, creating a pattern of light against the darkening sky. The bridge spans a body of water, with land visible in the distance. The overall atmosphere is serene and architectural.

Bridges vs Walls
